

THE 11

ORIGINALS

Issue: 5

June 2016

Hello!

In your hands you hold the **Fifth issue** of the school magazine **"The Originals 11"**. Our magazine will be published two times a year and we hope you will always enjoy reading it. In the **Fifth issue** you are going to read about the most important news from our school. This section is called **"Our school"** and we hope it won't be the only part you'll enjoy. One of the most interesting events which happened at our school this year was our celebration of the 400th anniversary of the death of one of the greatest English writers, **WILLIAM SHAKESPEARE**. The considerable part of this issue will be devoted to William Shakespeare and his life and work. This part will be followed by the **"SHORT STORIES"** written by our pupils who may aspire to be famous writers in the future.

For more information about our school you can look forward to articles such as **"Save a Tree, Adopt an Animal"**. Do not forget to also read serialized comic strip **"Nerd in London"**. It may be the last episode because our author Erik Daško is in the 9th form and is leaving our school this year. We wish him good luck at high school and we thank him for such a valuable work he did for our magazine!

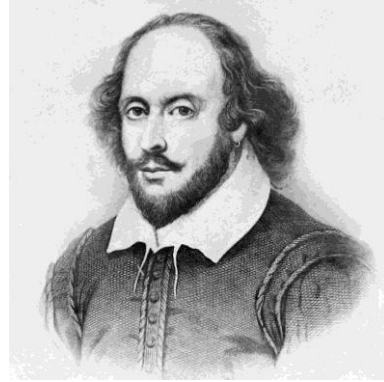

You can also read some of the **"Best School Memories"** of pupils from 9th form, who are leaving our school this year.

We hope you will enjoy this issue and that you will also join us to create and improve the following parts of our magazine. We need all of you, your help, advice and support.

Your editing team

William - *Shakespeare*

Who was it?

He was probably the greatest dramatist of England. He lived and worked in the 16th century in the period of the Renaissance.

The Birth

Shakespeare was born on 23 April 1564 in Stratford-upon-Avon. He was born at Henley Street and was one of eight children of Mary Arden and John Shakespeare. John Shakespeare was a successful tradesmen working with leather. He also sold wool and barley, important products in the England of those times. His father was a respected man who took part in civic life.

The Schoolboy

William Shakespeare went to the local grammar school in Stratford. The „grammar“ schools were the most common form of education, and they were free. He would also have learnt the Catechism and studied the Bible. Although he was brought up with these orthodox Protestant teachings, he managed to remain open-minded and a free-thinker. The Bible was a constant source of inspiration to him.

Marriage

In 1582 he married Anne Hathaway from Shottery. He was only eighteen, Ann was eight years older.

They had three children together – Susanna and the twins – Hamnet and Judith. In spite of his love for his family, he went to London in 1587 as it was only there that a man with his talents could get ahead and make a career for himself.

London

Shakespeare's life in London can be traced from 1592 onwards, first as an actor, then as a reviser and writer of plays. The theatres were very popular being the only places where people could hear honest comments about life.

Shakespeare and his fellow players were lucky enough to be able to win the patronage of the Lord Chamberlain, and the company came to be called the Lord Chamberlain's Men. Shakespeare is connected with the Globe Theatre.

Success

When Shakespeare was working in London, he did not leave his family for good. He would often return home to Stratford enjoying the Pleasures of family life. His plays may well have been popular with Queen Elizabeth I, who loved music and drama. When James I came to the throne after Elizabeth's death, he recognized Shakespeare's company as the leading group of actors and from then on they were known as the King's Men. In those times Shakespeare made enough money to build a comfortable life.

Death

He died on the same day as he was born. He was exactly 52 years old. He is buried at local Trinity Church, where he had been christened.

Work

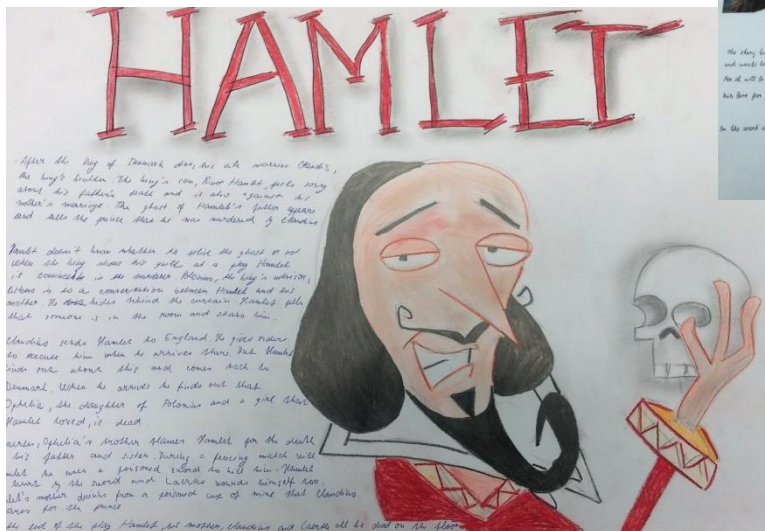

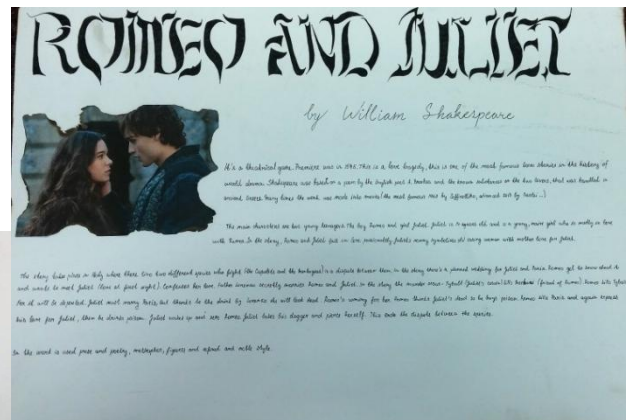

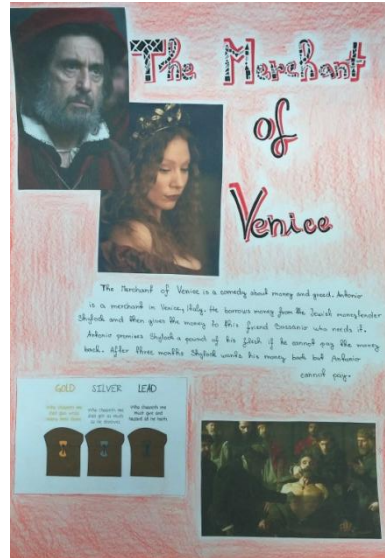

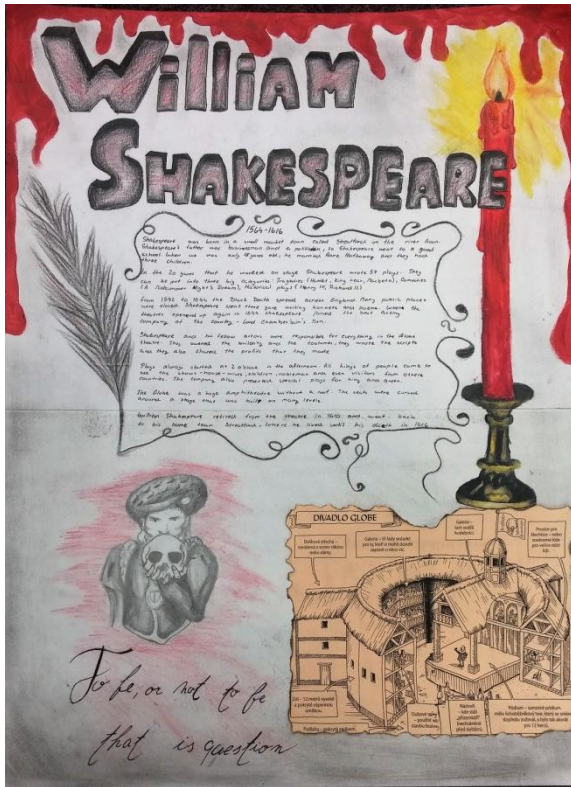

Shakespeare wrote: 37 plays and beautiful sonnets, comedies, history plays and tragedies:

- Comedies: Comedy of Errors, A Midsummer-Night's Dream, Much Ado about Nothing, As you like it e.g.
- History plays: Henry IV, Henry V, Henry VI, Richard III Julius Caesar
- Tragedies: Romeo and Juliet, Macbeth, Hamlet, King Lear, Othello.

William Shakespeare Projects

Because of the 400th anniversary of Shakespeare's death (1616) our English teachers organized a series of lessons devoted to him. During the lessons pupils found out a lot of about Shakespeare, his life and work. They were also asked to prepare their own projects devoted to this great writer. "The Originals 11" brings you the best of them.

On the following pages you will have a chance to read exclusive stories written by our young authors, who may aspire to be writers just like Shakespeare was. **Enjoy!!!**

Selfish Alien

Once there was a little alien girl. Her name was Mary and she lived on the planet – Mantophill. She decided to go to the beach to celebrate Christmas with her best friend Godzilla. Godzilla was very fat because she ate all the time. They met in the deep forest and they brought presents with them. Mary had a little box wrapped in beautiful wrapping paper for Godzilla (it was a beautiful orange from the Golden Garden) and Godzilla had a very big basket and even larger box for Mary.

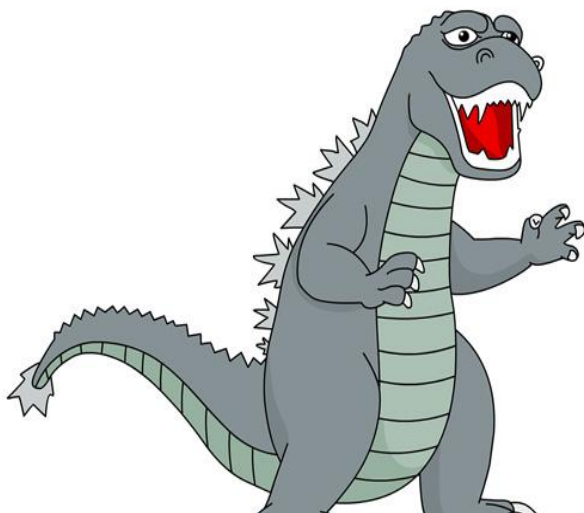

They came to the beach and they sat on the sand. They built the Christmas tree from sand. Mary gave the present to Godzilla but Godzilla didn't give the present to Mary because she liked the present as well and she wanted to keep it for herself. It was a little lamp with a colour light. Mary was sad but she decided to ask the Godzilla to play football with her. Godzilla declined because she was hungry. She opened her basket with 524 hamburgers and she started eating them. Mary decided to go for a swim and when she came back, Godzilla has just eaten her 347th hamburger.

They sat there for 2 hours. Later Mary asked Godzilla: „I would like a hamburger too, I am very hungry. “ But Godzilla was selfish and she said: „ No, the hamburgers are only for me. “

When Godzilla ate her last hamburger, they went home. But it was dark, so they got lost in the forest. They didn't know where they were. They went and went and they came to an old house. In the house there was a train, but only for one person. Godzilla wanted to go to the train, but she ate a lot of hamburgers and she was now very big. She couldn't pass through the door. Mary didn't leave her alone. They went on together. After 3 hours they came to their house.

There were their parents in the house and they were very frightened. Mary and Godzilla told their story and Godzilla's parents were angry because Godzilla was selfish.

The Honest Explorer

In summer 2015 in Australia, there was one honest explorer named Luke. Luke had a penguin called Ash with whom he loved to travel. One day Luke thought that it would be nice to visit the Czech Republic. So Luke and Ash went to pack their suitcases. After that they went to the airport and flew to the Czech Republic. When they were in the Czech Republic Ash thought that they could visit some small city and Luke decided to visit Frýdek-Místek. They stayed in Frýdek-Místek for one week and they liked it there so they decided to stay longer. Luke even found job there.

One day it was dark outside and Luke and Ash went for a walk. Suddenly they found some abandoned green school and they decided to break in. They walked pass the chemistry lab and they thought that they could make some potion for better learning. They checked the door and because it was open, they came in and started to work on the potion. Ash sometimes fell on the floor but it did not matter.

When they had their potion done, they decided to try it. So Luke tried the potion and he read some text but he didn't remember it. They tried it again but it started to bubble and reek.

Luke and Ash thought that the potion could explode so they ran away. Later they came back and they decided to try it once again. After they tried it for the third time the potion was finally done. Luke drunk it and read text and this time he remembered everything and Luke and Ash were very happy. Next day morning they went to make the patent.

school they hired Luke as Chemistry teacher and he did enough potion for all the kids studying there.

Cottage in mountains

Hi, my name is Sara, Sara with no H! I and my family went to our cottage in mountains on Sunday. Oh yes and actually I'm fairy, I have got wings and all things fairies have, I can do magic, I can fly...I can hide my wings with spell and many other things. I hate that because it is not comfortable.

But let's come back to our trip to the mountains. We arrived there and because I'm very courageous I decided to go higher. I used my wings to get faster to the top of the mountain. When I got there it was almost midnight. I looked around and when I decided to go home I saw a person who was looking directly into the full moon. Suddenly he grew a thick dark fur that tore his clothes. His nails grew into claws, his nose stretched in the muzzle, painful screams turned into howling and then I realized.... Yes it was WEREWOLF.

I started to fly as fast as I could but it seemed that his howl started to summon more and more werewolves. I didn't know where to fly because I was in the forest on the mountain. Then I saw it, a lake at the very top of the mountain. I jumped into it, my wings disappeared and my fish tail showed. I survived the night in the lake, and then I went back to the cottage. My mum started to shout at me and she reminded me that I was not allowed to walk to the top of the mountain and spend the night there. And then I woke up?!?! Was it just a dream? But wait? I was all wet and when I pulled down my blanket I saw a big fish tail where my legs should be. But then I woke up again?!?! WOW it was all only a dream in another dream. The next day I told everybody about my experience.

Surfer Roland

One day in spring Roland went surfing to prepare for races in the summer.

Unexpectedly he fell from his surfboard and sunk underwater. He saw a beautiful stone there and he wanted to take it home with him. He touched it and suddenly he saw houses everywhere. He could breathe underwater and he noticed that time passed slower. He saw mermaids as well. He was in shock and he could not believe his eyes. One mermaid swam up to him and greeted him. The mermaid told him that he must go and visit their princess named Rexha. She was the princess of the whole undersea empire. Thus, he swam with the mermaid to see the princess. They introduced themselves: "Hi, I'm Mira and you?"

"Hi, I'm Roland, where am I?"

"This is Country of Seven Shells. You became a merman because you touched the magical stone."

"Well, thank you." said Roland.

The moment he saw the princess he fell in love with her and she fell in love with him. He came up to her and confessed his love to her. The princess was happy that her love was reciprocated and started to prepare the wedding which had to be next day. Roland swam to the beach to say goodbye to the human life and accidentally touched the magic stone.

Suddenly he was again sitting on his surfboard and he started to cry. After he came home everyone asked him if he got lost because he was gone for a long time. He was very secretive and did not say anything. So they let it be, and Roland was very sad that he would never see Rexha. Rexha was very sad too because she knew she would never meet Roland again.

Sabina Čubová, 7.B

A cartoon illustration of a boy and a girl. The boy on the left is wearing a yellow shirt and blue pants, holding a brown book. The girl on the right is wearing a purple dress and pink shoes, holding a brown book. Both are smiling and waving.

On the next pages you may read about the best memories of pupils from 9th form who are leaving our school and would like to say their goodbye with these articles.

Biology Olympiad

In the seventh form I had an opportunity to enrol in Biology Olympiad and because I go into everything headlong and I like Biology I decided to participate in this competition. I learnt the study text for a school round. Because this text had about eighty pages it took me a few hours. School round had three parts - theoretical, practical and cognitive part. I managed to finish in third place. For the next round, this time among students from our town, I had to prepare input task. I have chosen topic „Crown jewels“ as my topic. I ended up in eighth place. There were twenty-six participants altogether.

This year the Biology Olympiad dealt with the topic „Life in the Dark“. This year was a very successful one for me. I ended the second round in fourth place and managed to secure a spot in the competition among students on a high school level. It was very difficult.

I am very proud of myself for how well I did in the Olympiad this year. I only needed several more points to get to the next round.

Petra Thérová, 9.C

My greatest experience

In English, we were tasked to write about our best experience in those nine years we are at the school. I can't name just one because we had so many good moments. I enjoyed, for example, when we were in Odra on a trip, where we kept throwing gummy bears and we laughed at how Nikča's shoes squeaked when she went for tea. Or when we were on the ski training, where I shared one room with Sabča, Terka, Klára and Žanda and the fun we had was absolutely the best. Another great experience was when we went to Lysá Hora on the Earth Day. Me and Nikča were chatting and laughing the whole time and we were so slow that we were on the top of Lysá half an hour later than the others☺. This way I would like to thank our teachers as well as my friends Nikča H., Sabča K., Terka K., Klára T., Evča CH. and Žanda Z. for the wonderful memories and moments I shared with them at our school.

My experience

I can't exactly say which experience was the best for me so I'll write about my recent experience in planetarium which I liked. I chose this experience because I like the universe. We arrived to the new planetarium by bus. The hall has been renovated as well as the observatory. It looked wonderful. The walls by the entrance were decorated by the planets. My classmates took some photos of it. :D

We had to wait outside because there was another group inside. Later we went in. There were interactive exhibits and so many new things. But my breath was taken away when we entered the projection hall. "Wow," I said. There was a purple backlight. It's one of my favourite colours.

After a short projection of the constellations they played a wonderful movie called *Graceful Ride through the Solar system*. It was like a beautiful dream. I felt like I flew through the universe. We were able to closely explore the planets of our solar system including comet and the life on it. I was excited the whole time. The universe is wonderful. Never in the past had I seen universe so closely.

It's just a pity that the chairs were not very comfortable otherwise it would be even better experience. After this short film we had a rest. They had a new shop with beautiful 3D photographs and other things like this in the planetarium shop.

At the end we quickly went to see the new exhibits such as vortex or electric ball. It was a great trip and I would definitely recommend it to other people. It's worth it!

Gymnastic competition 2016

I travelled with my team to the Czech Republic Championship in gymnastics in Prague on April 8th. Our task was to defend 12th title of the country champions. We went to Prague by train from Ostrava. The journey took us 4 hours. However we were not bored in train because we had a lot of fun thanks to our coach.

After arriving in Prague we had to take the tram to Strahov stadium and we had to go to a sports hall. Our accommodation was not far away. When we came into the sports hall we started to warm up. After that we returned to the hostel and went to bed early because we needed to sleep a lot.

In the morning we were very nervous. We began the competition with the exercises on the floor. I got the highest marks from the three of us. Then we went to the vault. For my jump I got 9.8 out of 10 which was totally awesome. I got such high points because I trained very hard. The last discipline was the trapeze. For the results we have waited for an hour. I could not believe my ears when they said my name and they said that I became a champion. It was the first time I took the cup. I have to thank my trainer Petra Tobias for her support and patience.

Plant a Tree and Adopt an Animal

It has now been 14 years since our school joined the project: Plant a Tree and Adopt an Animal. The goal of this project is to collect and recycle paper and various products made of paper. The money we earn is sent to Ostrava ZOO where it is used for our adopted bear called Olina. Every year the class which collects the most kilos of paper goes for a trip to the ZOO to visit the bear. So far we have collected 132 tons of paper. "The Originals 11" brings you the exclusive photos of the Bear and of our trips to the zoo.
